

Training on the Impact of Artificial Intelligence on
Financial Markets and Participation Banks

PURPOSE

The European Union Artificial Intelligence Act will gradually come into force in February 2025 with certain provisions. This process will concern not only European Union member states but also third countries in particular. In our country, the use of artificial intelligence in banks and financial markets has begun to be discussed within the framework of the "Regulation on Banks' Information Systems and Electronic Banking Services" and its subordinate regulations, as well as the "Regulation on the Operating Principles and Service Model Banking of Digital Banks". Within this framework, this training aims to familiarise participants with the work being done in the field of artificial intelligence in Turkey, the regulations introduced by the European Union Artificial Intelligence Act, and other international regulations and practices related to the field, and to share information, analysis, and conclusions regarding the place and use of artificial intelligence in banking and financial markets and its impact on the markets.

WHO CAN PARTICIPATE?

Legal advisory offices, credit allocation, monitoring and tracking units, risk monitoring and tracking units, operations units, information systems and digital and electronic banking services units, including managerial-level personnel, are suitable for participation at all levels.
